**Subject:** Picture of moonshining on Pinckney Island from 1931

I checked my link, it is from the noaa photo library. It doesn't give any other information other than identifying it as being on Pinckney Island and the photo haven been taken in 1931. When we were looking at that hut thing by they front gate, there was a metal barrel like this in there. However, I recall there is also a large metal barrel out at white point beach as well. I still would like to know what that big metal round thing is in the woods at white point beach.

A PINCKNEY ISLAND  
INDUSTRY

I also included it as a download.
